DETAILED ACTION

REASONS FOR ALLOWANCE

1. Claims 8-16 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The present invention comprises a method for transmitting a block of data from a data source to a data sink on a bus, comprising: transmitting control information; if the total number of data elements exceeds the size of a data frame; transmitting the data in multiple frames; and recognizing the data transmission is complete if the number of data elements received agrees with a number specified in the control information. The closest prior art, Bosch (NPL), Slivkoff et al. (US 2004/0170195), and Hamilton et al. (US 6,038,307), disclose a similar method that extends the CAN protocol with CAN application layer functionality to permit transmission of messages greater than the 8-byte CAN frame limit, and uses control information to determine if a received message is complete. However, Bosch, Slivkoff et al. and Hamilton et al., disclose neither that the data source transmits a data block at a point in time specified in the control information nor that the method is used in a development environment for a controller circuit, the data source being the controller circuit and the data sink being a host computer.
3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
